

Project Design Phase- ISolutionArchitecture

TeamID	PNT2022TMID20635
Project Name	Estimate the Crop Yield using Data Analytics
MaximumMarks	4Marks

SolutionArchitecture:

A complicated process with numerous sub-processes, solution architecture connects business issues with technological solutions. Its objectives are to

- To solve current business issues, find the finest technology solution.
- Explain to project stakeholders the structure, traits, behaviour, and other features of the software.
- Define the features, the stages of development, and the requirements for the solution.
- Specify the guidelines under which the solution is to be designed, managed, and delivered.
